EDUCATION

Baku Higher Oil School (BHOS) — Bachelor of Business Administration *Sep 2024 – Jun 2029*
GPA: 96.3 / 100 | Presidential Scholar — Top 3 of 20,000+ university entrance applicants (DIM score: 686 / 700) *Baku, Azerbaijan*
Relevant Coursework: Data Analytics · Business Law · Statistics · Calculus · Economics · Strategic Management

PROFESSIONAL EXPERIENCE

Incoming Summer Intern – Deloitte | Baku, Azerbaijan (Hybrid) *Jun 2026 – Jul 2026*

- Selected as 1 of 4 students among 150 students from Baku Higher Oil School for a high-intensity summer placement at Deloitte, awarded through a multi-dimensional evaluation of academic excellence (96.3 GPA), leadership behavior, and a proven track record in national innovation and technical challenges.

Business Analyst & Product Discovery Intern — Codveda Technologies | Remote *Mar 2026 – Present*

- Spearheaded a churn prediction initiative on 2,666 telecom customers — translating ML outputs (Random Forest ROC-AUC 0.91 via 5-fold CV) into a 5-recommendation retention playbook; identified international plan subscribers as a 3.8× higher-risk segment (~42% vs. ~11% churn) and proposed a 3rd-call early-warning trigger as the single highest-impact intervention.
- Architected a 4-tier fraud risk-scoring framework on 284,807 real transactions (0.172% fraud rate, 577:1 imbalance) — moving product thinking beyond accuracy to PR-AUC as the primary success metric; XGBoost model achieved PR-AUC 0.87, operationalized as an auto-approve / CVV-challenge / block / freeze intervention ladder at threshold 0.4.
- Quantified \$108,623 in high-risk monthly subscription revenue using a PostgreSQL behavioral risk-score model, then stress-tested a 15% retention uplift scenario — projecting \$195,522 in annualized savings to anchor business-case conversations with stakeholders.
- Delivered feature-engineering decisions that eliminated four perfectly collinear variables (charge = minutes × rate), reducing model noise and improving cross-validated performance — demonstrating end-to-end ownership from data discovery through deployment recommendation.

Data Analyst Intern (Outstanding Contributor — Top of 2,000+ Global Cohort) — Elevvo Pathways | Remote, Cairo-based *Feb 2026 – Mar 2026*

- Recognized as Outstanding Contributor out of 2,000+ international participants for consistently delivering analytics work that exceeded brief scope — the only BHOS student to achieve this designation in the cohort.
- Orchestrated an RFM customer segmentation engine on 95,000+ e-commerce customers, classifying six behavioral segments; surfaced that the top two segments (Big Spenders + Loyal) account for \$11.9M of total revenue — enabling direct marketing budget prioritization decisions.
- Designed a job-market analytics product (Python, Hugging Face dataset, 100K+ postings) that produced geo-stratified salary benchmarks and skill-demand rankings; key output: Data Engineer roles command highest global median salaries while Data Analyst roles dominate Azerbaijan postings — a finding directly applicable to Elevvo's talent-placement product.
- Produced an executive-ready Power BI retail dashboard (13M revenue, 1.47M profit, ~25K orders) with KPI cards and drill-downs by region, category, and product — compressing what previously required ad-hoc queries into a single stakeholder-consumable view.

Business & Finance Coordinator — International Youth Dialogue Platform | Baku, Azerbaijan (Hybrid) *Feb 2026 – Present*

- Oversee budget planning, financial reporting, and operational data for a multi-stakeholder youth platform; translate program-level metrics into resource-allocation and partnership-strategy decisions for platform leadership.
- Coordinate cross-functional workstreams across hybrid delivery — managing timelines, stakeholder communications, and dependency tracking across internal teams and external partners.

Vice President & Project Manager (3 concurrent club leadership roles) — BHOS — Conversation Club · Startup Club · Psychology Club · History Club | Baku *Sep 2025 – Present*

- Manage concurrent project pipelines across four university clubs (15–40 members each) — owning scope definition, milestone tracking, and stakeholder communication from ideation through execution; applied Agile-style iteration cycles to event planning and curriculum redesign.
- Scaled Conversation Club session engagement through structured curriculum redesign, growing active attendance and member retention; established regular feedback loops to iterate on session format and speaker quality.

Digital Product Growth — Content Platform — Self-Directed | Baku, Azerbaijan *Oct 2024 – Aug 2025*

- Scaled a zero-budget digital content platform to 2.1M+ total views, 70K+ likes, and 10K shares within 11 months by applying data-driven audience segmentation — analyzing engagement metrics (watch-time, shares, comment sentiment) to continuously refine posting cadence, content format, and topic selection.
- Managed full product lifecycle end-to-end: ideation → content brief → production → publishing → performance analysis → iteration; grew 38K profile views through audience community-building rather than paid distribution.

VENTURES & INNOVATION

Founder / Co-Founder across three concurrent ventures — two 1st-place hackathon wins in a single week (Apr 2026); three active incubations.

HyperAutomation (AutoFlow AZ) — RPA + AGV Warehouse Automation *2026 – Present*

- Accepted for active incubation at SabahHub (Sabah Incubation Program, 9th Cohort) among competitive applicants; selected to pitch at PASHA Hackathon 6.0 (May 15–17, 2026) out of thousands of applicants — one of the most competitive Azerbaijani startup showcases.
- Designed integrated RPA + Autonomous Guided Vehicle architecture for warehouse logistics targeting Azerbaijani SMEs; developed unit-economics model, pilot ROI framework, and phased deployment roadmap for investor and incubator presentations.

EcoConcrete — Nano-Mineral Carbon Capture Concrete Additive *Apr 2026 – Present*

- Won 1st place out of 100 university teams in the Alternative Energy & Clean Environment track; currently under active incubation at EmpowerMe Incubation and the 5th Tusi Incubation Program.
- Developed CO₂-sequestering concrete additive concept through nano-mineral carbonation; authored full pitch deck, go-to-market strategy, and B2B financial model targeting Azerbaijani construction market entry.

Milli Cloud Security — National Data Center Infrastructure & Security *Apr 2026*

- Won 1st place (AZN 1,500 prize) at AzCON Future Tech Hackathon — hosted by Holberton School Azerbaijan and AZCON Holding — for a cloud security and infrastructure solution addressing the security demands of Azerbaijan's emerging data center ecosystem.

LedgerLens — AI-Powered OCR for Handwritten Azerbaijani SME Ledgers *2025 – 2026*

- Developed AI-OCR product concept for handwritten Azerbaijani financial record digitization; built 13-slide investor deck benchmarked competitively against Google Document AI and Azure Form Recognizer on accuracy and unit-economics; submitted to ABB Incubation Program and Youth Empowerment Project Incubation.

INDEPENDENT RESEARCH & ANALYTICS

Azerbaijan Economy Analysis — Undergraduate Researcher supervised by the Dean of Business Department 2025 – 2026

- Constructed a 4-notebook end-to-end macroeconomic study (Python, pandas, scikit-learn) covering 20 years of data (2005–2024); OLS regression established $R^2=0.509$ ($p<0.001$), quantifying that each \$1 increase in Brent crude drives ~\$0.59B in GDP growth — challenging the simplistic oil-price narrative.
- Modeled the March 2026 Hormuz Crisis as a net-positive event for Azerbaijan via the BTC pipeline bypass (+\$2.35B/month additional oil revenue at Brent ~\$112); built a 3-scenario 2026 GDP stress test (\$74.7B–\$82B) anchored to the World Bank 2024 verified base of \$74.32B.
- Revealed real purchasing power increased only ~8–10% (2019–2024) despite 63% nominal wage growth — attributing the gap to cumulative inflation and the 2022 CPI shock (13.85%); published full analysis on GitHub with reproducible notebooks and source citations (World Bank, IMF, official statistics).

COMPETITIONS & RECOGNITION

- 1st Place** — AzCON Future Tech Hackathon — Milli Cloud Security: Holberton School / AZCON Holding · AZN 1,500 prize *Apr 2026*
- 1st Place** — EcoConcrete: 1st of 100 university teams at GreenTech 3 · Now incubated at EmpowerMe & 5th Tusi *Apr 2026*
- 3rd Place** — Data Driven Solutions Hackathon — Holberton School · Earned additional Holberton course access *Apr 2026*
- Finalist** — PASHA Hackathon 6.0 — HyperAutomation: Accepted to pitch among thousands of applicants *May 2026*
- Incubated** — SabahHub — Sabah Incubation Program, 9th Cohort: HyperAutomation AZ warehouse automation *2026*
- Incubated** — EmpowerMe + 5th Tusi Incubation Program: EcoConcrete carbon capture additive *2026*
- Top 29 / 150+** — Urban Hackathon 2026 — GreenMile B2B HR SaaS for commute emissions · Ministry of Youth & Sport *2026*
- Outstanding Contributor** — Elevvo Pathways Global Cohort: Recognized among 2,000+ international participants *Mar 2026*
- 5th Place / 29 Teams** — Hult Prize BHOS On-Campus Competition: Financial resilience & behavioral systems concept *2025*
- Presidential Scholar** — Ministry of Science & Education, Azerbaijan: Top 3 of 20,000+ applicants · Score 686/700 *Jun 2025*
- Alumni** — Aspire Leaders Program: Selected: 9,988 of 54,337 global applicants — Harvard-founded program *Dec 2025*
- Finalist** — Aspire x Cayu AI for Global Business Hackathon — Build prototype analyzing financial insights for SMEs *Jan 2026*
- Finalist** — Cursor Hackathon — Private Audit AI designed to analyze sensitive audit reports and documents *Feb 2026*
- 3rd Place** — YouthVision Ideathon, digital future and AI track — Transparent legal navigator for the Youth *Feb 2026*

SKILLS

Product Mastery: Agile / Scrum · Backlog management · User story writing · Stakeholder management · Product discovery · Requirements documentation · Go-to-market strategy · Financial modeling · Scenario analysis

Technical Fluency: Python (pandas, NumPy, scikit-learn, matplotlib, seaborn, XGBoost) · SQL (PostgreSQL, BigQuery) · Power BI · Tableau · ML classification (RF, LR, XGBoost, Isolation Forest) · SMOTE / class-imbalance handling · RFM segmentation · OLS regression · Cohort retention analysis

AI & Innovation: Generative AI (Holberton School AZ, 100% scholarship) · AI product owner (LedgerLens OCR, AutoFlow AZ RPA) · Rapid MVP prototyping · Competitive AI benchmarking

Languages: Azerbaijani (Native) · English (C1 — IELTS 7.0) · Turkish (Intermediate)

CERTIFICATIONS & LEADERSHIP PROGRAMS

- Aspire Leaders Program, Cohort 5** — Aspire Institute (Harvard-founded): Leadership, responsible AI, negotiation, entrepreneurship · 9,988 / 54,337 applicants selected *Dec 2025*
- GenAI Track — 100% Scholarship** — Holberton School Azerbaijan: Generative AI; earned ML course via hackathon *2026–27*
- EY Strategy & Corporate Finance School** — Valuation, capital structure, investment decision-making, financial planning *Dec 2025*
- IBM Python for Data Science** — IBM / Coursera: Python, data analysis, and ML foundations *2025*
- Deloitte Data Analytics Simulation** — Deloitte (Forage): End-to-end analytics workflow simulation *2025*
- IELTS Academic — Band 7.0** — British Council: C1 English proficiency *Apr 2025*
- 21st Century Management — Erasmus+ Youth** — Erasmus Plus 30-hour leadership, and management training *Jan 2026*
