

FIZULI HASANOV

AI INNOVATION & BUSINESS ANALYST | DATA-INFORMED PRODUCT BUILDER | PRESIDENTIAL SCHOLAR

+994 50 737 07 00 | hesenovfizuli2020@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

Presidential Scholar and BBA student at Baku Higher Oil School (GPA 96.3/100; Top 3 of 20,000+ applicants) with experience across AI-enabled product development, business and data analysis, innovation, and strategy research. Combines structured research, analytical tools, and product thinking to translate business problems into practical recommendations, venture concepts, and implementation roadmaps.

EDUCATION

Bachelor of Business Administration | Baku Higher Oil School (BHOS) | Baku, Azerbaijan Jun 2024 - Sep 2024

Academic standing: GPA 96.3/100 | Presidential Scholar | Top 3 of 20,000+ applicants | DIM score: 686/700

Relevant coursework: Data Analytics, Statistics, Calculus, Economics, Financial Accounting, Strategic Management

PROFESSIONAL EXPERIENCE

Sustainability & ESG Research Analyst | SRT Mentorship Program | Deloitte | Baku, Azerbaijan Jun 2026 - Present

Selected as 1 of 4 BHOS students; produced eight non-confidential research deliverables across telecom, energy, transport, and sports.

- Designed an ISAE 3000 (Revised) limited-assurance methodology for five telecom KPIs, including a 20-document PBC request list, evidence mapping, reconciliation procedures, and risk-escalation logic using public research and proposed evidence structures.
- Benchmarked telecom and oil-and-gas sustainability performance across 15+ international companies; developed phased roadmaps covering Scope 1/2/3 inventories, methane and flaring, renewable energy, circularity, CCS, KPI governance, and certification pathways.
- Converted global evidence into implementation-ready concepts, including a five-stream legacy-cable circularity model, a 12-month metro energy-recovery and smart-station pilot, and five advisory opportunity briefs for Azerbaijan's emerging green digital corridor.

Business Analyst Intern | Codveda Technologies | Remote Mar 2026 - Present

- Completed an applied fraud-detection analysis on 284,807 transactions with a 577:1 class imbalance; compared Isolation Forest, Logistic Regression, Random Forest, and XGBoost, with XGBoost achieving PR-AUC 0.87 and ROC-AUC 0.98.
- Tested leakage-aware preprocessing, training-only SMOTE, cross-validation, feature importance, and threshold sensitivity; translated model findings into a four-tier business intervention framework.
- Analyzed 2,666 telecom customers and identified international-plan users as a 3.8x higher-risk churn segment; compared predictive approaches and developed a five-action retention playbook.
- Created a PostgreSQL and Power BI churn-monitoring analysis for 10,000 customers and 200K+ usage records; quantified \$108,623 in high-risk monthly revenue and modeled \$195,522 in potential annual retention savings.

Data Analyst Intern | Outstanding Contributor | Elevvo Pathways | Remote Feb 2026 - Mar 2026

Recognized as Outstanding Contributor among 2,000+ global participants.

- Built a reproducible Python job-market analysis across 100K+ postings, including data validation, salary distributions, geographic comparisons, and skill-demand trends.
- Created an RFM segmentation pipeline for 95K+ e-commerce customers and an executive Power BI retail dashboard covering 13M revenue, 1.47M profit, and approximately 25K orders.

STARTUPS & VENTURES

LedgerLens | Co-Founder & Product Lead | AI-OCR Product for Azerbaijani SME Ledgers Jun 2026 - Present

- Leading product development for an AI-OCR workflow that digitizes handwritten Azerbaijani financial records; accepted into ABB's 6th Incubation Program.
- Defined the user problem, identified a 32+ pp accuracy gap in Azure Form Recognizer and Google Vision for local handwriting to anchor the product narrative, OCR and review workflow, competitor benchmarks, unit-economics assumptions, and investor narrative; preparing development and validation with the incubation team.

FinVeda | Founder | AI-Enabled Financial Wellness Venture Feb 2026 - Present

- Developing a financial-wellness product combining AI coaching, budgeting, missions, and simulation; awarded a \$400 Aspire Institute seed fund as one of 40 founders selected from 1,800+ global applications, simultaneously named 2026 Youth in Development Fellow (1 of 20 globally) by Aspire Institute x Impact Toolbox, with access to Harvard Business School Foundry, HBS's AI-native entrepreneurship platform.

HyperAutomation | Co-Founder & CEO | RPA + AGV Warehouse Automation Apr 2026 - Present

- Co-developing an integrated RPA and autonomous guided vehicle concept for warehouse operations; accepted into SabahHub's 9th incubation cohort and selected as a PASHA Hackathon 6.0 finalist.
- Developed the product architecture, SME-focused pilot concept, unit-economics model, ROI framework, and phased deployment roadmap.

Carboryn | Co-Founder | Carbon-Capture Concrete Additive Mar 2026 - Present

- Co-developing a nano-mineral carbonation concept for lower-carbon concrete; won 1st place among 100+ university teams at GreenTech 3 startup and innovation competition and progressed through multiple incubation programs.
- Contributed research synthesis, B2B positioning, financial modeling, go-to-market planning, and pitch development while distinguishing modeled assumptions from verified evidence.

SELECTED AI & DATA PROJECTS

Azerbaijan Economy Analysis – Undergraduate Researcher supervised by Head of BHOS Business Department *Apr 2026*

- Completed a four-notebook (Python, OLS Regression, Scenario Modeling) study covering 20 years of data; estimated that Brent crude explains 50.9% of GDP variance (R-squared 0.509, $p < 0.001$) and modeled purchasing-power and macroeconomic scenarios.
- Developed a geopolitical scenario model for the March 2026 Hormuz Crisis, demonstrating Azerbaijan as a net beneficiary via the BTC pipeline, quantifying +\$2.35B/month additional oil revenue at Brent ~\$112; designed a 3-scenario 2026 GDP stress test (\$74.7B–\$82B) anchored to the verified World Bank 2024 base of \$74.32B.
- Built a purchasing power index (2019 base) tracking nominal vs. real wage divergence across a 6-year panel — revealed that despite 63% nominal wage growth, real purchasing power increased only 8–10% due to cumulative inflation, with the 2022 CPI shock (13.85%) identified as the primary driver.

Additional Technical Prototypes | Cloud Security & Document AI

Feb – Apr 2026

- Co-developed Milli Cloud Security, a national data-infrastructure security concept that won 1st place at the AzCON Future Tech Hackathon; contributed solution architecture and enterprise positioning.
- Built and presented Private Audit AI, an offline document-analysis MVP designed to analyze sensitive audit reports without sending documents to external cloud services.

E-Commerce Growth & Retention Analytics | BigQuery, SQL, Python, Tableau

2025

- Created a structured analytics workflow on TheLook eCommerce data with fact/dimension tables, daily performance metrics, cohort retention, and reproducible SQL notebooks.
- Validated metric integrity in Python and identified a post-month-1 retention decline to 2-3% as the highest-impact growth lever; visualized findings in executive Tableau dashboards.

CAPABILITIES & TOOLS

Business & innovation: Business analysis, market and industry research, requirements definition, product discovery, competitive benchmarking, KPI design, financial modeling, scenario analysis, go-to-market planning

Data & visualization: Python for analysis (pandas, scikit-learn), SQL (PostgreSQL, BigQuery), Excel, Power BI, Tableau, data cleaning, segmentation, cohort and retention analysis

AI & product: Generative AI tools, prompt design, AI use-case research, workflow design, rapid prototyping, AI product strategy

Languages: Azerbaijani (Native), English (C1 - IELTS 7.0), Turkish (Intermediate)

SELECTED RECOGNITION & INNOVATION

- Accepted - ABB 6th Incubation Program: LedgerLens AI-OCR product | 2026
- \$400 Seed Fund - Aspire Institute: FinVeda; selected among 40 founders from 1,800+ global applications | Jun 2026
- 2026 Youth in Development Fellow - Aspire Institute x Impact Toolbox; one of 20 fellows selected globally, with access to HBS Foundry
- 1st Place - AzCON Future Tech Hackathon: Milli Cloud Security; AZN 1,500 prize | Apr 2026
- 1st Place of 100 university teams - GreenTech 3 Festival: EcoConcrete | Apr 2026
- 3rd Place - Holberton School Azerbaijan Data Driven Solutions Hackathon | Apr 2026
- 3rd Place – GəncVizyon Ideathon, Digital/AI Track | Feb 2026
- Finalist - PASHA Hackathon 6.0: HyperAutomation warehouse automation | May 2026
- Accepted – SabahHub 9th Incubation Program: HyperAutomation | Apr 2026
- Top 29 of 150+ teams – WUF 13 Urban Hackathon Baku | Mar 2026
- 5th Place of 13 finalists – Hult Prize BHOS Campus Round | Mar 2026
- Finalist – Aspire x Harvard Business School AI for Global Business | Jan 2026
- Outstanding Contributor - Elevvo Pathways global cohort of 2,000+ participants | Mar 2026
- Presidential Scholar – Ministry of Science and Education: Top 3 of 20000+ DIM applicants | Jun 2024

CERTIFICATIONS & PROGRAMS

AI & data: GenAI Track - Holberton School Azerbaijan (100% scholarship); IBM Python for Data Science; Deloitte Data Analytics Simulation

Strategy & leadership: Aspire Leaders Program; EY Strategy & Corporate Finance School; Erasmus+ Management Course

LEADERSHIP & COMMUNITY

- Vice President, BHOS Conversation Club: Led 30+ member weekly sessions and redesigned the curriculum using participant feedback
- Project Manager, BHOS Clubs: Managed scope, timelines, and communication across three concurrent clubs. | Aug 2025 – Present
- Independent Content Creator – TikTok: scaled platform to 2.1M+ views and 70,000+ likes with zero paid reach | Oct 2024 – Aug 2025
